UNCEMENTED HIP STEMS

ODEP Ratings

5A is awarded for a survival rate higher than **94,5%** at **5 years**

ODEP ratings are awarded to implants that have demonstrated certain survival rates based on data meeting ODEP's criteria for the strongest data quality.^{1*}

5A is awarded for a survival rate higher than **94,5%** at **5 years**

13A is awarded for a survival rate higher than **91,5%** at **13 years**

The uncemented hip stem LCU, SP-CL and C.F.P. received this high quality rating for a hip stem implant awarded by the United Kingdom's Orthopaedic Data Evaluation Panel.

1. ODEP Rating of all products can be checked at: <http://www.odep.org.uk/products.aspx>

* A minimum cohort of 150 hips/knees at the start of the study (consisting of data from beyond the developing centre and from more than 3 centres/surgeons) with a minimum of three years follow-up and an actual revision rate better than 94.5%. All deaths, loss to follow-up, failures and indications for revisions are recorded. A minimum of 66% prosthesis at benchmark time.
